KINDY TICE

Summary

Eager to use my recent experience at Dev Boot Camp as a catalyst to transition my career from a dependable, reactive problem solving Technical Support role into a more proactive problem solver as a software developer. Offering a tireless work ethic, creative mind and passion for learning today's technologies.

Employment

Dev Bootcamp
San Francisco, CA
Student — Oct 2014 to Mar 2015

Strengthened my familiarity in web design while learning the fundamentals of programming, database design, test-driven development and object-oriented design. In addition to over 1000 hours of coding, I learned invaluable lessons in teamwork, pair programming and engineering empathy.

Newton Software
San Francisco, CA
Technical Support Engineer and Implementation Manager — Aug 2012 to Sep 2014

- Built, designed and maintained newly onboarded customer's public-facing Careers webpages.
- Built 508-compliant job applications in XML and reformatted in HTML.
- In company infancy handled technical support for over 600 customers and provided best practices and training for new employees.
- Worked closely with Development and Products teams in bug resolutions, product development and customer issues.

Betabrand
San Francisco, CA
Head of Customer Service & Inventory, Web Development — Oct 2011 to Aug 2012

- Responsible for updates and status of deployed and pre-ordered merchandise, with 2-4 new products introduced each week.
- Produced new product details in WordPress and assisted in HTML code for weekly e-mail newsletters.
- Handled customer experience through in-store visits, emails and over the phone.
- Trained and managed new customer service representatives.

iStream Financial Services
Brookfield, WI
Customer Care Representative, Deployment/Inventory — May 2010 to Aug 2011

- College intern who became Customer Care's point person for all technical calls, acting as a liaison to Development team.
- In house expert on flagship product, the remote deposit capture terminals.
- Responsible for detailed inventory and troubleshooting of defective models.
- Averaged over 500 calls per month on a broad spectrum of issues.
